<i>Date:</i>	<i>Owner's signature:</i>

To be completed by the veterinarian:

Chip control: correct not correct absent

Physical examination (facultative):

Auscultation:	<input type="checkbox"/> heart rate bpm	<input type="checkbox"/> regular rhythm	<input type="checkbox"/> sinus arrhythmia	<input type="checkbox"/> pathological arrhythmia
	<input type="checkbox"/> systolic click	<input type="checkbox"/> muffled	<input type="checkbox"/> no murmur	<input type="checkbox"/> systolic murmur
	<input type="checkbox"/> diastolic murmur	<input type="checkbox"/> continuous murmur	<input type="checkbox"/> punctum maximum	<input type="checkbox"/> grade / 6

Echocardiography:

HF:	Mean (cm):		Mean (cm):		Mean (cm):
IVSd:		IVSs:		AO (SA):	
LVDd:		LVDs:		LA (SA):	
LVWd:		LVWs:		LA/AO:	
FS%:				LA (LA):	

Qualitative assessment:

Mitral valve:	<input type="checkbox"/> no lesions	<input type="checkbox"/> borderline prolaps	<input type="checkbox"/> prolaps mild - moderate - severe	<input type="checkbox"/> thickening mild - moderate - severe
Regurgitation:	<input type="checkbox"/> none / physiological	<input type="checkbox"/> mild	<input type="checkbox"/> moderate	<input type="checkbox"/> severe

Classification:

- Class A:** no abnormalities.
- Class B:** minimal lesions at the mitral valve.
- Class C:** mild lesions at the mitral valve.
- Class D:** moderate lesions at the mitral valve.
- Class E:** severe lesions at the mitral valve.

Comments/other cardiac abnormalities:

The meaning of this result was discussed with the owner, and although there is no official breeding restriction in **the Netherlands / Belgium** regarding mitral endocardiosis in the Cavalier King Charles Spaniel, based on the results of this echocardiographic exam, a **positive / negative** advise for breeding was given.

It **was / was not** advised to repeat the examination in **1 year / 2 years**.
